

Co-branded sleeve guide

This document, along with the Adobe Illustrator (AI) template provided, contains everything you need to design a co-branded sample collection kit for your business

The Medichecks Kit

Our CE marked sample collection kits can be broken down into three parts:

- The box
- The box contents (instructions, lab form, medical components, return postage envelope)
- The sleeve (customisable to your brand)

Adobe Illustrator Template

You will find all the assets you need to design your sleeve in the Al template, including sleeve layout, print markings and Medichecks logo.

Fold Marks Cut line

Bleed and Measurements

Design rules

There are several rules you need to follow when designing your sleeve. These rules are in place to ensure your design meets all CE marking requirements.

Do not:

- Make any medical or product claims.
- Add a CE mark to the kit. There is a CE mark on the manufacturing label.
- Change or add any additional processes.

\odot

Do:

- Change the style of "Sample Collection Kit" to be in line with your brand.
- Make sure all required text is legible.
- Include at least one Medichecks logo.

The term 'Sample Collection Kit' cannot be altered and must be included on the front of your sleeve. You can amend the format, size, and position to match your brand style/rules.

colour in this location. **FRONT BACK M** medichecks Sample Can colour but glue added here. Collection **Kit** You must be 18 or over and a UK resident to take this test. Our tests are not a substitute for seeing your doctor, especially if you are experiencing symptoms. Our doctors will interpret your results taking into account all the information you have provided to us, but will not diagnose, consult or provide any treatment. You will be advised to see your doctor for any necessary follow-up action. MC - V2 - 14.04.23

Glue is applied on this side. We recommend only adding FRONT BACK

Our legal copy is a requirement and can't be changed. If you choose to amend the colour of the text, please ensure it is still legible.

FRONT BACK

This number must be edited by yourself to create a version number unique to you using the following format: company initials/version number/submission date

Our brand

There are multiple versions of the Medichecks logo built-in to the AI template.

Each variation has pre-built padding - avoid anything that overlaps this padding.

Do not adjust any of the logo colours.

Our logo should be used at a 1-2-1 scale to your logo and should not appear warped.

There are pre-defined positions established in the template where we are happy for our logo to sit.

There must be at least one Medichecks logo visible on the sleeve.

Each logo location has both a light and a dark version, allowing the Medichecks logo to be visible on either light or dark backgrounds - which in turn gives you greater freedom with sleeve design. These can be toggled on or off in the layers panel. Only one version should be visible to prevent overlapping.

Submitting your sleeve for approval

You will need to submit your co-branded sleeve design to Medichecks for approval.

Our compliance and medical team will ensure that it meets all CE marking requirements, and our in-house design team will ensure it adheres to our brand guidelines.

We will also print a physical copy of your sleeve to ensure exceptional print quality.

If any changes are required your sleeve will need to be re-Submitted for approval.

Please send your custom sleeve design to hello@plasma.medichecks.io as a print-ready pdf file.

If you have any questions, please get in touch with your account manager.
